

POOLMASTER POOLS

W.A. DRICLAD DISTRIBUTOR
LINER POOL SPECIALISTS

EXTRAS; AUTOMATIC & SPECIALTY EQUIPMENT

AUTOMATIC CLEANERS: . The Zodiac Baracuda is ideal for above ground pools at \$450 purchased with a colourbond pool . (The Baracuda comes free with a Noosa Reef resin pool)

AUTOMATIC SANITISERS: The salt in the water and liquid chlorine will corrode metal frames. An Ozone Generator unit is a very good sanitising unit and retails at \$1290. [See Ozone generation sheet for full details]. A Clearwater self-cleaning salt chlorinator comes standard with the Noosa Reef resin above ground pool only. A chlorine auto tab feeder is \$195.

PATTERNED LINERS: These liners are 0.5mm material and can be combined with an all over marble effect. They are available in 3 colours & prices are an extra \$240 for an all over patterned liner. These liners are made by Walco using Nylex Material to suit Australian conditions; they have a 10-12 year life span. Colours are called Pacific, Med Marble and Pebblecrete.

UNDERWATER LIGHT: We utilise the Spa Electrics A/g light and transformer. The unit has a stainless- extension arm to suit the pools top wall and can be fitted at any stage. No holes need to be drilled into pool or liner. The price is \$440 for LED. This price is only when bought with package.

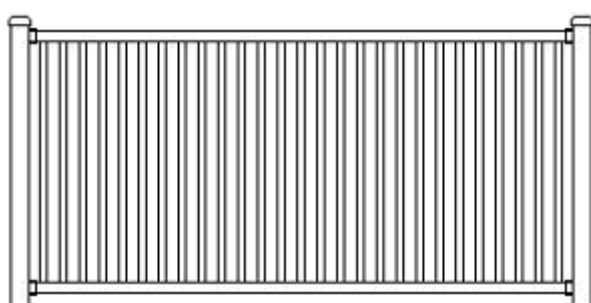

STAINLESS STEEL LADDERS: They come in a number of configurations, cement mount for in-ground & flange mount for timber decking, also 2, 3 or 4 steps. This leaves a balance of \$299 (for 2 step) when deducting the plastic safety ladder normally included in a pool kit price. An alternative is a plastic ladder that floor mounts available at no extra cost.

A white walk in easy entry step system is also available at an extra cost of \$750 or \$550 as a swap over for the safety ladder.

TIMBER DECKING: Decking can be made to any height and any size around a pool. Normally it is half the wall height or full height. Where full height is being planned it is normal to have the timber finishing under the pools top decking to allow its removal for liner refits. If the timber is required over the pool decking, allow for the removal of the timber for liner refits. Regardless of timber type, fasteners on the top face should be stainless steel & underside galvanised.

SOLAR PLUMBING: Where solar heating is required. We supply 2 safety suction & 1 return, T-piece and end caps . The heating plumbing can then be connected when required. Cost \$150

FENCING:

See DVH Fencing

Above minimum is 2x1.5m panels, 4x posts & 1200mm gate with magna latch & hinge kit
