 YOU WILL REQUIRE 75% LESS COLLECTOR THAN REGULAR SOLAR HEATING SYSTEMS

**MAKING A SPLASH**

YOUR SWIMMING SEASON JUST GOT LONGER

## UPGRADES AVAILABLE FROM YOUR EXISTING SOLAR HEATING SYSTEM

### EXTEND YOUR SWIMMING SEASON THE ENERGY EFFICIENT WAY.

With its modular designed barrel union connection system, not only is it quick to install but easily added to if required. Everything you require to install the panels to the roof area are included in each panel box. Panel stands are purchased separately and it is recommend that they be used on a flat roof to ensure the optimum pitch. We strongly recommend a separate solar pump or booster pump. A new updated Sun + Solar controller is required to gain the most efficiency from the sun. We guarantee this product to be 100% Cockatoo proof

Please use the chart to calculate how many panels you will require.  
This may depend on the roof angle and the position of the collector.

\*Results may vary according to the location and the environment that the system is installed, calculated on a north facing roof at a 25degree pitch.

Pool Size	No. of panels required
3.5m x 7.0m	4-6 Panels
4.0m x 8.0m	6-8 Panels
9.0m x 4.5m	8-10 Panels
10m x 5.0m	10-12 Panels

This product is manufactured from superior grade material to ensure the long life of the system. All panels are tested prior to installation to guarantee, you the customer are receiving a quality product.

#### The Sun + Solar Heating system carries a 5year Pro Rata Warranty.

Our Automated system allows a no fuss heating solution, allowing you to set your ideal temperature and your solar heating will do the rest.

Sun + Solar Controller

Sun + Panel Stand  
(sold separately for optimum pitch on a flat roof)

#### Modular solar system installed
